Management and Leadership

Environmentally Preferable Products and Services

PreventFirst provides a variety of testing services and training (LiveScan Finger printing for Background Checks (Maryland CJIS Provider), Security Guard & Private Investigative Services (Unarmed/Armed), DNA Paternity Testing, Employee/Public Wellness Health Screening, Food Handlers Certification, Phlebotomy/EKG Training, Notary Public, and CPR/First Aid Training) in an office that strives to reduce its environmental impacts.

Waste

Recycling

We recycle paper, plastics and cans.

Energy

Energy Efficiency

We turn off exam room lights when not being used and unplug and power off tools and machines at the end of the business day.

Transportation

Employee Commute

Our wellness coordinators work from home.

Efficient Business Travel

Staff meet at a common location and then travel in a company van to scheduled screening events. We estimate that this saves at least 10,000 miles of vehicle travel per year. This amounts to 455 gallons of gas, \$1,183.00 in gas cost savings, and a reduction of 61.674 lbs of hydrocarbons, 460.352 lbs of carbon monoxide, 9160.0 lbs of carbon dioxide and 30.617 lbs of nitrous oxide emissions. We also reduce business travel through teleconferencing and ridesharing to special conferences.

Fleet Vehicles

We ensure that tires are properly inflated and rotated on a regular basis, use gas cleaning supplies and perform other scheduled vehicle preventive maintenance.

Profile Updated January 2017

Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.
